Nguyen Thanh Huy

Fullstack Developer

PROFILE

Computer Science graduate of the University of Engineering and Technology, VNU Hanoi. Fullstack developer delivering e-commerce platforms, landing pages and Android applications with a strong focus on UX/UI, cross-device compatibility and practical deployment. Applies AI agents and custom Skills to raise development speed and code quality.

EXPERIENCE

Fullstack Developer

Magento 2 · Vue.js · React.js · Kotlin

- Build and customize e-commerce storefronts on Magento 2, and web interfaces with Vue.js and React.js.
- Design and deliver landing pages that balance visual polish, usability and responsive behavior.
- Develop Android applications in Kotlin, backed by MySQL and MongoDB data layers.
- Use AI agents for requirement analysis, writing and optimizing code, debugging, UI building and automating routine tasks.

Freelance Translator and Video Editor

Language & digital content

- Game localization and Vietnamese–English translation for novels, films and documents.
- Video editing, subtitle editing and timing synchronization for natural, high-quality viewing.

SELECTED PROJECTS
